

CLEARING THE AIR

PORT METRO
vancouver

REDUCING CONTAINER TRUCK EMISSIONS

Container trucks registered to serve Port Metro Vancouver operate throughout our local communities. Trucks fitted with special emission reducing equipment, as well as trucks manufactured more recently, produce lower amounts of particulate matter and other pollutants, benefiting air quality throughout our region.

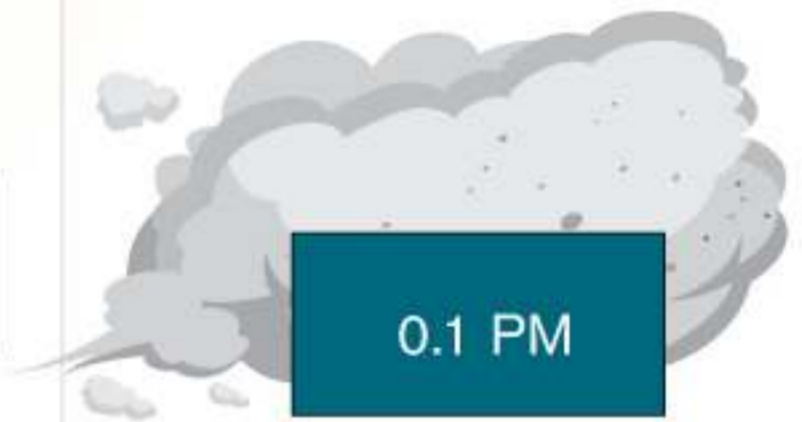

TRUCK EMISSIONS

PM: PARTICULATE MATTER
affects air quality

Truck and engine
manufactured between

1994-2006

Truck and engine manufactured
between 1994-2006, fitted with
a **DOC** (diesel oxidation catalyst)
reduces particulate matter
by **20%**.

Truck and engine manufactured
between 1994-2006, fitted with
a **DPF** (diesel particulate filter)
reduces particulate matter
by **85%**.

Truck and engine
manufactured in
2007 OR NEWER

Trucks and engines manufactured since 2010 also include decreases in other pollutants, including significant decreases in Nitrogen Oxides (NOx)
