Sustainable Gateway Initiative Update

Draft Sustainable
Gateway Definition

Initiative Overview

Our corporate vision is – *to be the most efficient and **Sustainable Gateway** for the customers we serve, benefitting communities locally and across the nation.*

PMV launched this initiative to define what a Sustainable Gateway looks like, to support the corporate vision, and help plan for the future.

Initiative Objectives

The initiative has two primary objectives:

1. Sustainable Gateway Definition

Define what a **Sustainable Gateway** means to PMV in order to support business planning and communications.

2. Integration Framework

Define an approach for integrating the Sustainable Gateway Definition into PMV's business planning process and day-to-day decisions and activities.

Engagement Process

The first phase of consultation in 2013 included three rounds of internal engagement and two rounds of external engagement with Advisory Panel to help create a draft definition.

The second phase of consultation in 2014 broadens engagement with Gateway participants to discuss the draft definition and obtain feedback.

Gateway Participants

When we refer to a Sustainable Gateway, we consider the following participants to be part of that system:

- Terminal operators, tenants, shippers, marine carriers
- Service providers (railways, trucking, marine, labour)
- Government at all levels
- Communities
- First Nations
- Non-Government Organizations
- Canadians

Draft Sustainable Gateway Definition

Leadership and Collaboration

A sustainable Gateway encompasses:

- Economic prosperity through trade
- Healthy environment, and
- Thriving communities

Built upon:

- Shared aspirations
- Collective accountability, and
- Meaningful dialogue

Economic Prosperity Through Trade

A sustainable Gateway delivers economic prosperity through trade, focusing on:

Competitive Business

The Gateway:

- Continuously improves efficiency and reliability, providing exceptional customer service
- Is profitable, delivering lasting value locally and nationally
- Reinforces economic innovation, diversity, resiliency, and adaptability

Effective Workforce

The Gateway:

- Maintains a skilled and productive workforce to meet current and future needs
- Provides an attractive work environment and rewarding career choices

Strategic Investment and Asset Management

The Gateway:

- Maximizes the efficient use of land and infrastructure assets
- Anticipates and delivers infrastructure to meet capacity needs in a timely way to adapt to changing environmental, social, and economic conditions

Healthy Environment

A sustainable Gateway maintains a healthy environment, focusing on:

Healthy Ecosystems

The Gateway:

- Takes a holistic approach to protecting and improving air, land and water quality to promote biodiversity and human health
- Champions coordinated management programs to protect habitats and species

Climate Action

The Gateway:

- Is a leader among ports in energy conservation and alternative energy use to minimise greenhouse gas emissions and mitigate climate change
- Protects its assets against potential impacts of climate change

Responsible Practices

The Gateway:

- Improves the environmental, social, and economic performance of infrastructure through design, construction and operational practices
- Supports responsible practices throughout the global supply chain

Thriving Communities

A sustainable Gateway enables thriving communities, focusing on:

Good Neighbour

The Gateway:

- Proactively considers effects on communities in planning and managing operations
- Identifies and responds to community interests and issues

Community Connections

The Gateway:

- Seeks opportunities to strengthen regional benefits and share Gateway prosperity
- Engages communities and is a catalyst for celebrating Canada as a trading nation

First Nations Relationships

The Gateway:

- Respects First Nations traditional territories and values traditional knowledge
- Embraces and celebrates First Nations culture and history
- Understands and considers contemporary interests and aspirations

Safety and Security

The Gateway:

- Upholds safety and security to protect port users and neighbouring communities
- Promotes a culture of emergency preparedness that supports rapid restoration of essential community services and business activities

Feedback

Discussion questions:

- Are there aspects of the definition that could benefit from clarification?
- Which areas are you interested in? And, what does success look like for you in these areas?
- What are some related challenges or opportunities your team is working on?
