HABITAT ENHANCEMENT PROGRAM

Port Community Liaison Committee

June 25, 2014
• Creating and restoring fish and wildlife habitat
• Providing a balance between a healthy environment and future port projects
• Consistent with the Port’s approach to environmental stewardship and sustainability
More than 70% of tidal marsh habitat has been lost in the Fraser River Estuary.

Tidal marsh is vital habitat for fish and wildlife.

Currently working with agencies, stakeholders, and First Nations to restore tidal marsh habitat.
