

August 2017

The Deltaport Truck Staging Facility is designed to address long-standing community concerns about road safety by providing a designated port container truck staging area and removing port destined container trucks from the roadway. The project will result in significantly reduced traffic congestion due to trucking queues along Deltaport Way.

The facility will be located at the intersection of Highway 17, Highway 17A and Deltaport Way in Delta, B.C.

CONSTRUCTION BEGINS

August 2017

COMPLETION EXPECTED

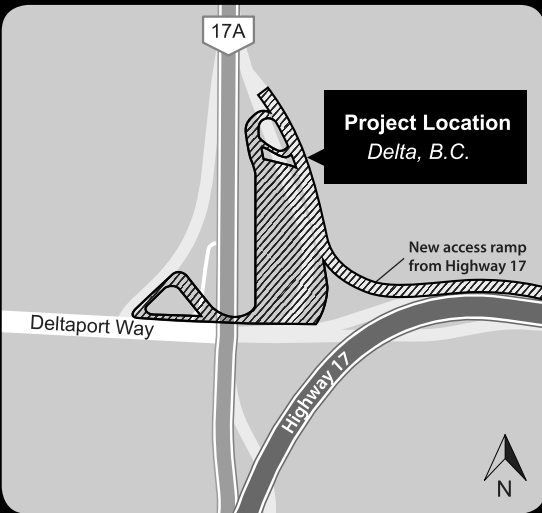

2018

Construction will include installing a new highway exit ramp to facilitate access from Highway 17 and an additional road entrance ramp to allow traffic access onto Deltaport Way.

The Vancouver Fraser Port Authority will operate the staging facility.

Project Benefits:

- Increased road safety on Deltaport Way and nearby roadways
- Reduced port destined container truck queues, resulting in less traffic congestion and engine idling
- Accommodate up to 140 trucks, including early arrivals

The project is part of the Deltaport Terminal, Road and Rail Improvement Project (DTRRIP), and is a joint partnership with the Government of Canada, British Columbia Ministry of Transportation and Infrastructure, and the Vancouver Fraser Port Authority.
