

Centerm Expansion Project/ South Shore Access Project Design Build Contractor Update

The Centerm Expansion Project and South Shore Access Project is a proposed series of improvements to the Centerm container terminal and off-terminal road and rail on the south shore of the Burrard Inlet. The port authority has initiated project procurement in parallel with the permitting process to ensure that, should the project be approved to proceed, it can be constructed and operational, when the added capacity would be needed.

The Vancouver Fraser Port Authority (VFPA) received three Design Build proposals on October 26, 2017 in response to the issued Request for Proposals. Following the evaluation of the responses received, Centennial Expansion Partners (CXP) was identified as having the best value proposal. CXP is an unincorporated joint venture between Dragados Canada, Inc. (Dragados), Jacob Bros. Construction Inc. (Jacob Bros.) and Fraser River Pile & Dredge (GP) Inc. (FRPD). Commercially confidential negotiations are underway.

The Design Build Contractor will be responsible for the design and construction of the Centerm Expansion Project and South Shore Access Project. Subject to permits and approvals, construction of the Project could begin in the summer of 2018 and continue for approximately two and a half years.
