Dear Jurgen Franke:

**Re: Vancouver Fraser Port Authority Project Permit No. 12-066 and 12-066-1 - Extension
Neptune Terminals – Coal Capacity Project and West Quadrant Shiploader Amendment**

Vancouver Fraser Port Authority (the Port Authority) has received a request from Neptune Terminals (Neptune) to amend the expiry date for Project Permit PER No, 12-066 and 12-066-01 to December 31, 2021. The Port Authority understands that the four-month extension is required to complete minor outstanding project components such as pre-commissioning tasks, which include instrumentation, mechanical and electrical adjustments, and equipment modifications and inspections.

On behalf of the Vancouver Fraser Port Authority (the port authority), I am pleased to advise that the Project Permit for the above-noted work has been extended. This permit is now valid until December 31, 2021. Failure to complete the works by this date may result in the need to apply for a new Project Permit.

Neptune is responsible for carrying out the works according to the subject conditions contained in the Permit. Please ensure that those involved in undertaking the approved works are aware of these conditions and that a copy of the Permit is maintained on site during the project. Please submit all documents required to satisfy the conditions listed in the Project Permit to per@portvancouver.com.

Thank you for your cooperation throughout our review. Should you have any questions regarding this approval, please contact Noel Allison at 604-665-9382 or Noel.Allison@portvancouver.com.

Yours truly,

Vancouver Fraser Port Authority
