## Users of Clark Drive overpass and local community

### Re: Construction outside of regular work hours notification Clark Drive Overpass Rehabilitation Project

This letter is to advise users of the Clark Drive overpass and local community members of planned work outside of regular work hours for some activities associated with the ongoing rehabilitation of the overpass by the Vancouver Fraser Port Authority.

#### Project overview

The port authority is conducting routine deck maintenance and rehabilitation work on the Clark Drive overpass. The work consists of removal and replacement of deteriorated concrete and reinforcement steel, and installation of permanent lane delineators.

The Clark Drive overpass work is being coordinated with the [South Shore Access Project](#) to minimize overall effects to road users.

#### Construction times

Concrete pouring activities have been scheduled outside regular work hours to avoid day-time traffic volume and reduce the effect of vibration on new concrete.

We anticipate the work to take place on the following days (excluding weekends) between 6:00 p.m. and 6:00 a.m.:

- August 8 to 12, 2019
- September 19 to 23, 2019
- September 26 to 30, 2019 (if necessary)
- October 10 to 14, 2019 (if necessary)

Local residences may hear noise from portable concrete mixers, but we expect this noise to be minimal.

We encourage members of the public who have questions to contact Lisa-Marie Martin, communications advisor at 604.665.9164 or email at [Lisa-Marie.Martin@portvancouver.com](mailto:Lisa-Marie.Martin@portvancouver.com).

You can also contact the port authority's community feedback line at 604.665.9004 or [Community.Feedback@portvancouver.com](mailto:Community.Feedback@portvancouver.com).

Yours truly,

Vinil Reddy  
Senior Construction Project Specialist, Engineering and Maintenance  
VANCOUVER FRASER PORT AUTHORITY
