Hello Rhona,

I received your submission regarding the CP rail expansion, and was wondering if you would be able to provide some further information in order for me to conduct our review. On the Notice of Works, it indicates that there will be infilling along the existing track to provide space for expansion, and the installation of a temporary unloading pad. In the drawings, there are also a temporary access site, and three habitat offsetting areas indicated. Would you have the project description document that these appendices came from? I am looking for more information on all aspects of the project in order to conduct a review. This information would include descriptions of each item, area covered, volume of fill, along with construction materials, construction methodology and time lines. I will be in the office on Tuesday July 02 should you have any questions regarding what I am looking for.

Thank You,

Jonn Leeden
