Sea Life Sums!

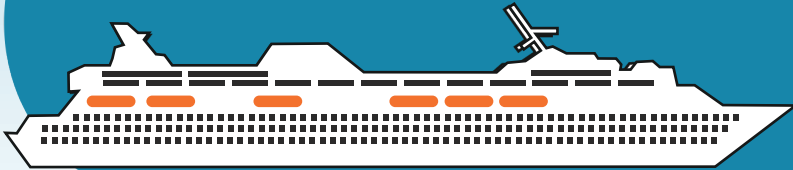

In this grid each animal represents a number: 1, 2, 3, or 4. When all the numbers in a row or column are added together, they equal the totals at the side and bottom. Can you figure out what number each object represents, and write it down in the answer boxes below?

Fish and other underwater creatures like sea stars and octopus live in port waters.

Answers: Fish = 1, Octopus = 2, Heron = 3, Sea star = 4

Can you spot 4 differences between these two cruise ships?

The Port of Vancouver is homeport to the Vancouver-Alaska cruise, one of the world's most popular cruises.

How many new words can you make from the letters that spell...

ENVIRONMENT

Did you know the Port of Vancouver was the first port in Canada and third in the world to implement shore power at Canada Place? This is an effective way to reduce air emissions by enabling cruise ships to shut down their engines and connect to electrical power while docked.
