## **Re: Field investigations – Portside Blundell Road Improvements Project**

The Vancouver Fraser Port Authority is writing to notify you that we will be undertaking field investigations for the Portside Blundell Road Improvements Project this weekend. The purpose of these investigations is to better understand the condition of the existing pavement to inform project designs.

### **Timing**

- Saturday, June 18, 2022
- Work hours: 8:00 a.m. to 6:00 p.m.

### **What to expect**

On sections of Portside Road, Blundell Road, and No. 8 Road, a truck will take readings at test intervals of 25 to 30 metres. The truck will stop at a test location for about five minutes to collect data, then move to the next test location until the work area is complete (see Figure 1).

### **Traffic changes**

Single lane alternating traffic will be required while the work is underway. At each test location, there will be two traffic control persons to guide traffic for the duration of each test.

### **Thank you**

We appreciate your patience and understanding as we carry out this important work. When complete, the Portside Blundell Road Improvements Project will increase the efficiency and capacity of the transportation corridor.

To stay up-to-date on the project, you can sign up for the project newsletter at:

[portvancouver.com/portsideblundellupgrades](http://portvancouver.com/portsideblundellupgrades)

If you have any questions, please contact [gateway@portvancouver.com](mailto:gateway@portvancouver.com) or 604.665.9004. We will respond in a timely manner to questions and concerns.

Sincerely,

**R. M.**

Roxana Mousavi

Acting manager, infrastructure delivery

Vancouver Fraser Port Authority

## About the Portside Blundell Road Improvements Project

The Vancouver Fraser Port Authority is proposing to upgrade roadways in the Fraser Richmond industrial lands. This location and its connections to major transportation routes and facilities make it an active industrial area for warehouse and transload businesses that pack and unpack shipping containers moving to and from the Port of Vancouver. This corridor has some of the most concentrated activity in the region for moving goods from marine terminals to rail lines and trucks, and then off to other destinations.

We aim to improve the efficiency, capacity, and safety of the transportation network by:

- Building a new overpass over the CN rail line, connecting Blundell Road and Portside Road
- Widening Blundell Road from two lanes to four lanes between the No. 8 Road intersection and just west of York Road
- Building a new bridge and extension of Portside Road over the No. 7 Road canal
- Developing a new multi-use pathway along the north side of Blundell Road and south side of Portside Road
