Re: Portside Blundell Road Improvements Project's second phase of engagement begins today

The Vancouver Fraser Port Authority is proposing to upgrade roadways in the Fraser Richmond industrial lands to improve the capacity, efficiency, and safety of the transportation network. We invite you to learn more about this proposed project and share your feedback to help finalize the project designs and inform a construction staging and traffic management plan. We encourage you to share this information with anyone you think may be interested such as employees or your customers.

How to participate

You can learn more and provide your feedback from June 20 to July 25, 2022.

Attend an online information session on Tuesday, June 28, 2022 from 10:30 a.m. to 12:00 p.m.

During the session we will provide a presentation about the project and the project team will be available to answer any questions and to hear your feedback. [Sign up here.](#)

Watch the project video and read the discussion guide at

About the project

The port authority is proposing to upgrade roadways in the Fraser Richmond industrial lands. This location and its connections to major transportation routes and facilities make it an active industrial area for warehouse and transload businesses that pack and unpack shipping containers moving to and from the Port of Vancouver. This corridor has some of the most concentrated activity in the region for moving goods from marine terminals to rail lines and trucks, and then off to other destinations.

Traffic flow in the area is impacted by a busy rail crossing. Vehicles back up when a train is passing over the crossing, leading to unnecessary idling and preventing access to businesses along Portside Road and Blundell Road. As trade grows, and a greater volume of containers move through the area, the delays are expected to worsen.

We aim to improve the efficiency, capacity, and safety of the transportation network by:

- Building a new overpass over the CN rail line, connecting Blundell Road and Portside Road
- Widening Blundell Road from two lanes to four lanes between the No. 8 Road intersection and just west of York Road
- Building a new bridge and extension of Portside Road over the No. 7 Road canal
- Developing a new multi-use pathway along the north side of Blundell Road and south side of Portside Road

What's next

We will summarize the feedback received during this phase of engagement and share it with the community in summer 2022. We expect to share the final designs and the construction staging and traffic management plan for the project between December 2022 and April 2023.

More information

The Portside Blundell Road Improvements Project was identified in the Greater Vancouver Gateway 2030 Strategy. The strategy recommends ways to improve the region's trade network, while addressing community impacts of goods movement.

This project is funded by the port authority, CN, and the Government of Canada through the [National Trade Corridors Fund](#).

If you have any questions about the project, please reach out to the project team by email gateway@portvancouver.com, or phone: 604.665.9004.

Sincerely,

Roxana Mousavi
