

Commissioner Street Road and Rail Realignment Project Newsletter – Update

September 2021

You are receiving this email because you signed up to receive updates about the Commissioner Street Road and Rail Realignment Project.

Updated fall construction schedule

Construction on the [Commissioner Street Road and Rail Realignment Project](#) is progressing well and the project is reaching its critical activities that are also weather dependent.

In order to stay on schedule and avoid delays, the contractor will be working on September 30, 2021 (National Day for Truth and Reconciliation). At the time the project awarded this contract, this day was in the schedule and is now within a critical activity. Our contractor on the project has requested to work on this day and is ready to recognize this statutory holiday by wearing orange shirts.

Construction activities will take place during port authority standard work hours (Monday to Saturday, 7:00 a.m. to 8:00 p.m.), with the exception of construction activities outlined in the updated [fall construction schedule](#).

What to expect

As much as possible, we will limit the nightshift work. Please note that activities will generate noise and some light from the project site, but will not be continuous except the bypass pumping as noted above. To address these impacts, we will implement the following measures to reduce noise and light as much as possible:

- Conducting activities that may result in more noise, such as excavation using a vacuum truck (hydrovac), in the early hours of the night shift (5:00 p.m. to 8:00 p.m.)
- Shrouding stationary equipment to contain the noise
- Facing lights on construction site away from residences
- Using silent pumps during the bypass pumping for Metro Vancouver sanitary sewer relocation activities
- Ensuring all noticeable noise (such as white noise back up beepers on equipment) is well within 70 dBA as per WorkSafeBC construction guidelines

Noise inquiries

The project team has implemented a process to track and respond to project-related inquiries about noise. We invite you to direct any noise queries pertaining to the project to csrr@portvancouver.com.

To effectively monitor and respond to your noise queries, please include the following information:

- Date and time of noise (day and night)
- Description of noisy activity
- If this noise is new or has been heard since the project started construction on April 12, 2021
- Location of the source of the noise, or where it is being heard from

About the project

The Vancouver Fraser Port Authority is undertaking a roadwork project to widen and realign Commissioner Street to the north between Nanaimo Street and Slocan Street in order to make room for Canadian Pacific Railway (CP) to add additional rail tracks. This project is being done to help improve the cargo capacity of port terminals on the south shore of Burrard Inlet in preparation for growth in Canadian trade, and to fulfill our mandate to enable trade through the Port of Vancouver. The project received funding from the Government of Canada through the [National Trade Corridors Fund](#).

The project is being completed by B&B Heavy Civil Construction Ltd.
