

November 24, 2022

REMINDER - TLS Minimum Truck Age Entry Requirement

Effective, January 1st, 2023, new or replacement trucks entering TLS must be 2016 or newer.

Further to the Notice in June and the reminder in September, we wish to take this opportunity to once again remind TLS participants that as of January 1, 2023, all additions, replacements and returning trucks to a TLS fleet must meet the new minimum requirement of a 2016 model age truck, with equipment compliant with all original factory installed emissions standards. Applications to add model year 2014-2015 trucks must be complete, including all necessary paperwork and information, on or before 3 pm, (PST), December 31, 2022.

Please note: All TLS trucks are subject to periodic inspection.

Reminder

Provided the vehicle's owner remains on the Office of the British Columbia Container Trucking Commissioner's eligible Independent Operator (IO) List, for a period of 90 days trucks owned by unsponsored IOs will not be considered by the port authority to have exited TLS.

If you have any questions about this upcoming change, please feel free to contact the TLS Program Administration team at tls@portvancouver.com.

Thank you for your attention to this important notice.

Sincerely,

A handwritten signature in black ink, appearing to read 'Andy Sekhon'.
